Darshit Varshney

Backend Developer | AI Automation | Python & Full-Stack Engineer

darshitvarshney1928@gmail.com +91-9927231085 Aligarh, Uttar Pradesh, India

LinkedIn GitHub

Summary

Backend and AI Automation Developer with hands-on experience building REST APIs, database architectures, and intelligent workflow automations using Python, FastAPI, PostgreSQL, and Next.js. Experienced in multimodal AI systems, Qwen2-VL fine-tuning with LoRA/QLoRA, LangGraph agent workflows, WhatsApp automation, and Flutter mobile applications. Focused on modular, maintainable code and reliable software systems.

Technical Skills

Languages	Python, JavaScript, TypeScript, Dart, SQL
Core CS	Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
AI & LLMs	Qwen2-VL, LoRA/QLoRA Fine-tuning, LangGraph, Multimodal AI, Scikit-learn, NLP, TF-IDF
Backend	FastAPI, Flask, Node.js, REST APIs, Webhooks, Socket.IO, JWT Authentication
Frontend	Next.js, React.js, Tailwind CSS, HTML5, CSS3
Mobile	Flutter, Dart, Mobile App Architecture
Databases	PostgreSQL, MongoDB, Redis
Tools	WhatsApp Cloud API, Git, GitHub, Docker, Linux, Postman, Selenium, BeautifulSoup

Projects

ChallanSave Live Platform

Next.js — FastAPI — MongoDb — WhatsApp Cloud API — AI Workflows

- Developed full-stack features for a traffic legal-assistance platform, integrating REST APIs, background task handlers, and third-party verification services.
- Built an Admin web portal and automated WhatsApp bot pipelines to streamline case management and user engagement.

ANTARIX – SatQuery AI GitHub

Python — Qwen2-VL — LoRA/QLoRA — LangGraph — Computer Vision

- Built a multimodal satellite-imagery analysis platform using Qwen2-VL-2B-Instruct, fine-tuned with LoRA/QLoRA for domain-specific visual question answering.
- Developed LangGraph agentic workflows for satellite-image captioning, natural-language querying, and temporal change detection.

Music Streaming App Frontend — Backend — APK Demo

Flutter — Dart — REST APIs — Audio Streaming — State Management — PostgreSQL

- Developed a cross-platform mobile music player using Flutter with background audio playback, playlist management, and a dynamic user interface.
- Engineered a backend service for media indexing, streaming delivery, metadata resolution, and user-library synchronization.

Business Data Scraper GitHub

Python — Web Scraping — Automation — Excel — REST APIs

- Engineered an automated scraper to collect structured business information from Google Maps, including names, phone numbers, emails, addresses, and geo-coordinates.
- Implemented high-speed and deep-extraction modes with Excel reporting, proxy handling, and retry logic.

Experience

Challan Save challansave.in

Backend Developer & AI Automation Intern (6 Months) *June 2026 – Present*

- Built REST APIs and an Admin Portal using Next.js, FastAPI, and MongoDb for dispute resolution, case management, and administrative analytics.
- Engineered WhatsApp bot automation using webhooks and AI support workflows for challan inquiries and automated client assistance.

Education

Ajay Kumar Garg Engineering College, Ghaziabad 2024 – 2028

Bachelor of Technology in Computer Science and Engineering *Ghaziabad, India*

Blue Bird Senior Secondary School, Aligarh 2023

Class XII – CBSE (Science) *Aligarh, India*

Certifications & Achievements

Certification: Machine Learning with Python – *Froyo Technologies (P) Ltd.*
